

Section Reduction

The outlined plan is based upon a 2 year phase reduction. In the proposed plan, no population of students will be transitioned to a new center. Section reduction will be based off of enrollment trends at individual elementary centers. This plan has the least effect on faculty, staff, community members, and students while simultaneously accounting for attrition and enrollment fluctuations.

The following scenarios are provided in the event of continued enrollment numbers over 2 years.

2012-2013 section reductions:

- 1 section of 4th grade in Atkins
- 1 section of 4th grade in Keystone
- 1 section of 5th grade in Keystone

2013-2014 section reductions:

- (1 section of 2nd grade in Norway) Optional reduction
- 1 section of 3rd grade in Norway
- 1 section of 3rd grade in Keystone
