November 11, 2009

Dear Parents & Guardians,

Benton County Public Health is planning a vaccination clinic for H1N1 influenza at your school on November 24, 2009 in the morning.

On the day of the clinic, your child needs to be feeling well in order to receive the vaccine.

If your child was vaccinated for the seasonal flu with nasal Flumist, we need to know the date of the vaccination. This may make a difference in which type of vaccine your child will receive.

If your child ( age 9 and under) has already received a first dose of H1N1 vaccine, please indicate below the date of that vaccination, as the doses of H1N1 need to be given at least 1 month apart.

Please fill in the pertinent information on the lower portion of this page and return to the school for clinic day.

Thank you,

Benton County Public Health

Child's name: \_\_\_\_\_

\_\_\_ No seasonal Flumist was given

\_\_\_ Yes- Seasonal Flumist was given on \_\_\_\_\_

\_\_\_ My child received the first dose of H1N1 vaccine on \_\_\_\_\_
